# Byggma is set to continue demonstrated growth through identified growth avenues

# Large growth potential for further consolidation within building material products

Several attractive M&A targets has been identified

## Breakdown of identified M&A targets (# targets)

By product offering

■ Adjacent products ■ New products

- Adjacent products include wood fibreboards, particle and MDF boards, and wall panel
- New products include wind- and moisture barriers for roofs and walls, surface products, timber, decking and cladding panels

By revenue (2019)

■ < NOK 300m ■ NOK 300-1,000m  
■ NOK 1,000-3,000m ■ > NOK 3,000m

- Majority of the targets have revenues in the range of NOK 100-1,000m
- 4 targets have revenues exceeding NOK 1bn

## Fragmented building material product market with large M&A potential

## Byggma M&A strategy and track record

- Byggma has a strong M&A track record having completed 9 acquisitions since IPO in 1997
  - The acquisitions have been highly successful and allowed Byggma to strengthen its position in established markets as well as expand the product offering and make Byggma a diversified provider of building material solutions
  - Company integration has been a core focus and Byggma has successfully grown the companies' topline and profitability post implementation
- The Nordic building material market is highly fragmented with large potential for consolidation
- Going forward, Byggma intends to be a part of a wider industry consolidation and has identified a shortlist of 11 potential M&A targets with a combined revenue of approx. NOK 17.6bn<sup>1</sup>
- The shortlist includes companies with supplementary product offering as well as new product segments with significant potential for synergy realization
  - Revenue synergies from capitalizing on Byggma's well-established and experienced sales and distribution channels to grow the revenues of the acquired companies
  - Cost synergies from utilizing Byggma's organisation and operational experience

# Investment highlights

Note 2: The numbers for Masonite Beams include all revenue and costs related to the Beam segment, including the beam revenue and costs still legally belonging to Huntonit AS

# Targeted approach towards environmentally friendly production and initiatives

# Byggma's manufacturing and product offering contribute to a more environmentally friendly society

**5.8%**

The CO<sub>2</sub> abatement from Byggmas board products corresponds to 5.8% of the Norway's total road traffic emission

**47%**

Masonite's I-beam systems use 47% less raw material compared to massive tree constructions

**12%**

Huntonit's specific energy consumption has been reduced by 12% over the last 5 years

**48%**

Forestia's new closed cooling system has contributed to 48% reduction in use of cooling water

# Byggma takes an active role towards sustainability and responsible production

*Byggma's main goal is to develop and deliver sustainable solutions based on renewable raw materials and unique competence. Sustainability is, and has always been, a core element in Byggma's business model and a natural part of its overarching goal. Management and Board of Directors in Byggma wish for sustainability to be a natural part of operations and innovation in the Byggma group*

## Climate and Environment

- Effective utilization of raw materials
- Manufacturing facilities located with proximity to raw materials
- Packaging solutions with minimum waste while ensuring protection during transportation
- Wood-based building materials store significant amounts of carbon
- Effective distribution system for transportation of goods to customers
- The wood that is applied is sourced from certified suppliers or sustainable forestry
- Resource effective constructions lead to good utilization of raw materials
- Ensure that we do not pollute the environment that affects life on land, watercourses or the ocean.

## Human and Society

- Employees are given the opportunity for personal and professional development
- Collaborations with academia
- Vocational education
- Advanced training
- Factories with proximity to raw materials
- Byggma's presence contributes to sustainable cities and communities
- Byggma's presence provides significant assignments and income for other players in the value chain

## Business model

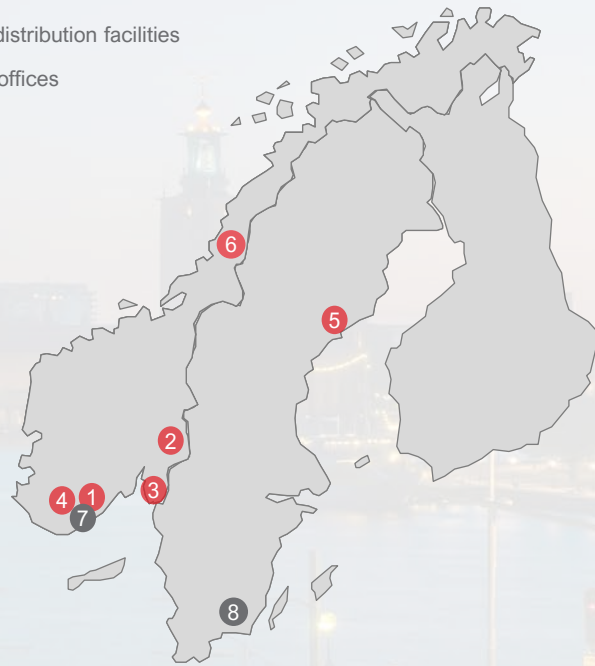

- Good profitability gives basis for secure jobs and development of the companies
- Byggma is seeking new and innovative solutions for a better customer experience and a more profitable and efficient construction process
- Focus on the triple bottom line in all R&D activities
- Increased efficiency and streamlining of operations through continuous improvement and industrial investments

# Leading Nordic presence, with growing international customer base

## Production facilities and offices

## Revenue by country (NOKm)

# Strong topline and profitability improvements last few years

- Organic growth from 2015-2018, while the growth from 2018 is a combination of organic growth initiatives and the acquisition of Smartpanel (2018) and Byggform (2019), adding NOK 117m in revenues in 2019, and NOK 34m in 2020 (full-year effect of the Byggform acquisition)
- The growth in 2020 and 2021 is partly related to realized market synergies from increased market share following the Smart Panel acquisition. Other growth drivers include change in product mix, volume increase (partly off-set by a drop in Europe), price increases and other (incl. currency)

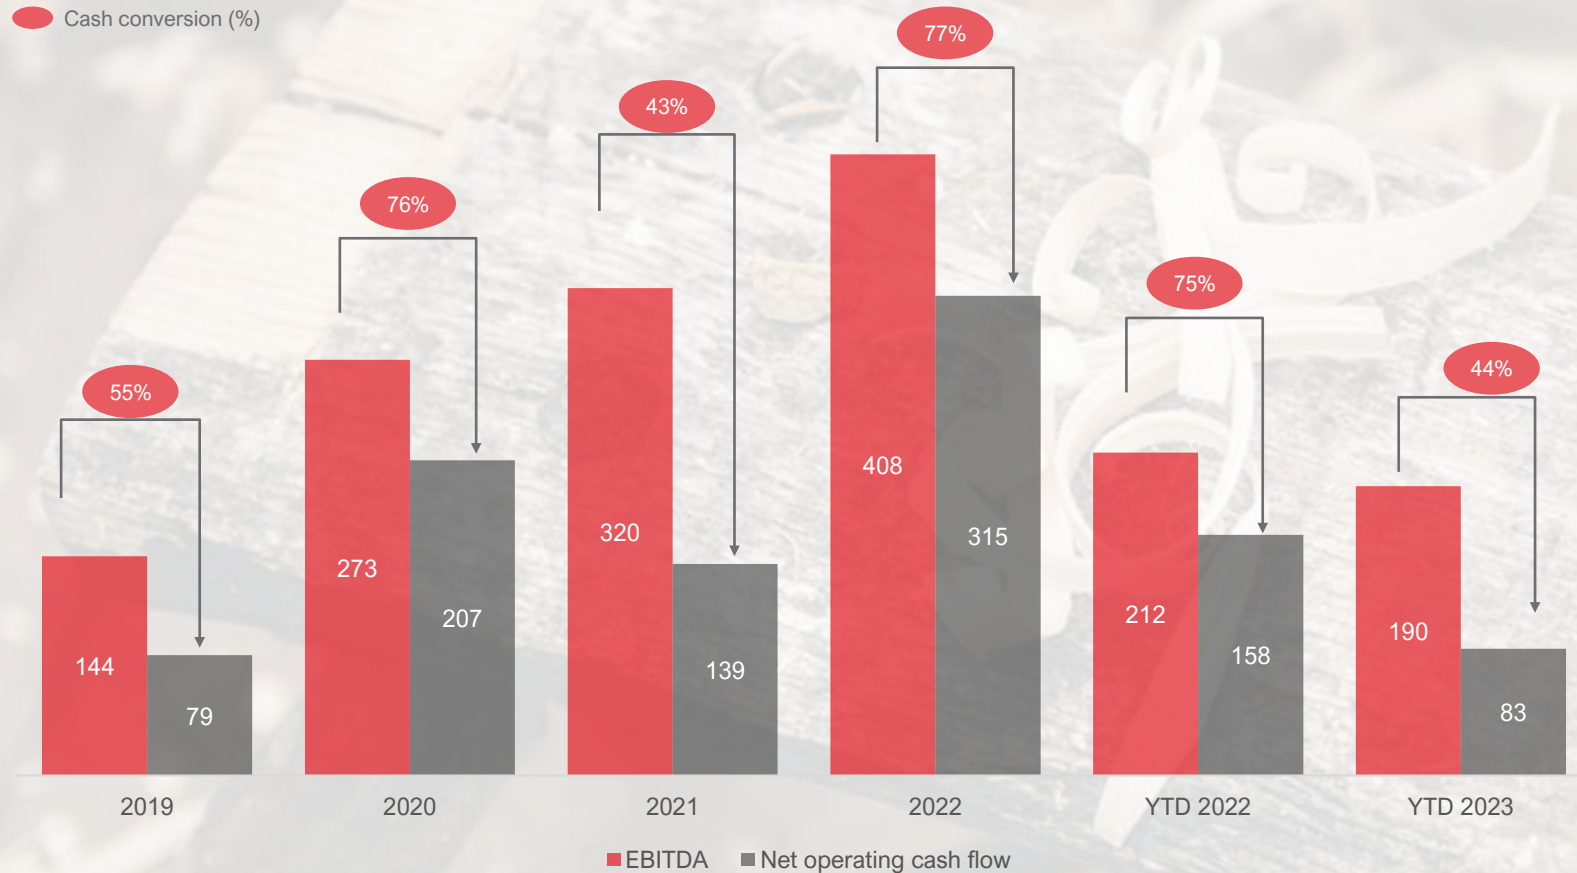

- Byggma has more than doubled its EBITDA and more than tripled its EBIT since 2019
- The strong improvement is primarily due to realization of synergies from the Smartpanel acquisition, product mix optimization and price increases. Byggma has seen an increase in raw material prices and experienced unfavorable currency development, but has been able to offset this by increase prices to end users and ultimately improve the margins
- In 2019, the EBITDA and EBIT have been adjusted for normalizations following the acquisition of Smartpanel in 2018

# Robust cash conversion ratio

Operating cash flow and cash conversion (NOKm)

- Byggma has a history of strong cash flow generation over the last years which is set to continue going forward
- This has allowed the company to invest significantly in product innovation in addition to increased manufacturing capacity and efficiency
- Since 2016, annual Capex amounts to approx. NOK 100m while maintaining an attractive dividend capacity
- If desired, Byggma can manage annual maintenance Capex in the range of NOK 30-50m and hence generate even stronger free cash flows going forward
- Byggma has targeted a long-term dividend payout ratio of minimum 30%-50%
  - The company will pay out a higher dividend when possible after evaluating various growth opportunities
